

One of my greatest visions for Salome Elementary School is to be an advocate for students, utilizing the A, B, C, approach. A is for accountability to all students that they will get the best education that they deserve. B is for responsible budgeting by utilizing your tax dollars in the best possible way which will allow this process to happen. and C is for the community to be involved in this process.

I have been an educator for 30 years . During this time I have been the chairman of the Southern Oregon Bargaining Council and President of the Southern Oregon Education Association where I became involved in budgeting, curriculum, planning and development of a tax base for various school districts.
